

Online Course

Digital Manufacturing for Industrial Design

4 weeks ■ 3-4 hours per week ■ Cost: €375 ■ Start date: May 21, 2019

Introduce yourself to the design process and latest techniques of digital manufacturing, a disruptive technology that is changing the world of industrial design. Put it into practice through hands-on assignments using software.

Additive manufacturing technologies covered:

- material extrusion • powder bed fusion
- material jetting • binder jetting
- photopolymerization

Software used:

- Cura • Preform • Recap360 • Meshmixer • Rhino
- Grasshopper
