

Aeroacoustics ONLINE PROGRAM

Learn to predict and verify aeroacoustic performance of mechanical systems and apply noise reduction technologies

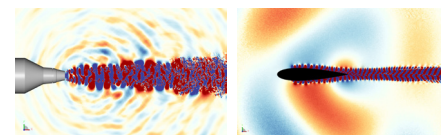

We offer:

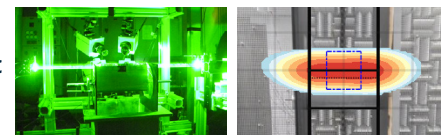

- Practical exercises on **mechanical systems**
- Industry-relevant content for leading companies
- Expertise from our world-class instructors
- Opportunity to connect with professionals

You will learn about:

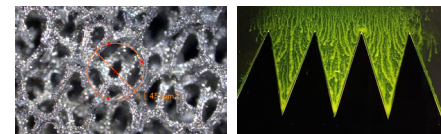

Aeroacoustic noise generation mechanisms

Acoustic and aerodynamic measurements

Noise reduction technologies

“An opportunity to learn about the fundamentals and how to apply them in various applications.”

Stefan Oerlemans, Head of Noise Section, Siemens/Gamesa

“Well explained. With the knowledge gained I'm setting up a basic Aeroacoustics laboratory.”

David Gomez, Aeroacoustics Lead, Parrot
